

Instructions for Person-Centered Planning Training

The Person-Centered Planning Training course provides Waiver Support Coordinators with information for ensuring person-centered service delivery for consumers on their caseloads. WSC's will learn how person-centered planning can enhance the quality of life for consumers with disabilities. Person-Centered Planning enables consumers to direct their lives and provides opportunities for the consumer to plan for their future.

The Person-Centered Planning Training program is divided into 4 modules. Throughout each module there are interactive slides with questions to test the WSC's knowledge. WSCs must complete each question to proceed.

At the end of Module 4, the WSC will be prompted to complete a survey to register and certify their completion. Click the link on the last slide and complete the survey for credit of completion. While completing each module, please be sure to make note of the date that each module was completed as this will be required for certification of completion. Please be sure to print the training certificate. **The WSC must retain the certificate for their records and auditing purposes.**
