Introduction

FL Agency for the Persons with Disabilities (APD) has contracted with WellSky to allow providers to import select data into APD iConnect in lieu of keying the data directly into the application. This document provides workflow steps for sending activities data through an XML file for import directly into the APD iConnect system. This includes service logs, daily attendance logs, daily progress notes, and trip logs.

Chapter 1 | Setup

Data Elements, Mapping, and File Layout

Each Provider who will use the Activities Import XML file will use the "Provider Activities Import Fields.xls" that outlines what data elements that can be included in the XML file that will import into iConnect. The Provider will use this as a guide when coding their XML export file that will export data from their system into the correct XML file format and syntax which will be used to import data into iConnect.

You can use online xml syntax checkers to validate the XML file. https://onlinexmltools.com/validate-xml

Example 1: Sample XML File

There are several data elements required in the XML file. Some are values supplied by the provider, and others are iConnect generated data elements. A report exists in APD iConnect that provides the iConnect generated data elements. See the <u>External</u> <u>Provider Activity Report</u> section of this manual for more information.

Each XML file must include the following:

iConnect Field Label	XML Tag	Required	Notes
Unique Record Identifier	<submitterid></submitterid>	Y	Contains the iConnect generated ID for the provider plus the first 5 letters of the Provider name.
Case No.	<caseno></caseno>	Y	iConnect generated ID number for the consumer
Consumer First Name	<firstname></firstname>	Y	Must match iConnect value
Consumer Last Name	<lastname></lastname>	Y	Must match iConnect value
Start Date	<startdate></startdate>	Y	Sample Date: 2020/12/25. Multiple values can be sent. i.e. Daily Attendance Logs. See Example 2 below.
Start Time	<starttime></starttime>	Y	Sample time: 15:30:00
End Date	<enddate></enddate>	Y	Sample Date: 2020/12/25. Multiple values can be sent. i.e. Daily Attendance Logs. See Example 2 below.
End Time	<endtime></endtime>	Y	Sample time: 15:30:00
Authorization ID	<authorization></authorization>	Y	iConnect generated ID number for the authorization
Authorization Service ID	<authserviceid></authserviceid>	Y	iConnect generated ID number for the authorized service
MemberID	<workerid></workerid>	Y	iConnect generated ID number for the worker on the submitting Provider's record.
Location	<location></location>	Y	Do not send a value, but the following placeholder must exist in the file: <location></location>
Primary Diagnosis	<primarydiagnosis></primarydiagnosis>	Y	Do not send a value, but the following placeholder must exist in the file: <primarydiagnosis>osis></primarydiagnosis>
Status	<status></status>	Y	Must equal Complete
Program	<program></program>	Y	iConnect generated ID number for the provider. An open iConnect Provider Selection record must exist for this provider on the consumer's record.

VServiceID	<vendorserviceid></vendorserviceid>	Y	iConnect generated ID number for the authorized service for the provider.
Total Cost	<totalcost></totalcost>	Y	Do not send a value, but the following placeholder must exist in the file: <totalcost></totalcost>
Units	<units></units>	Y	Send the total number of units for the activity. APD iConnect application has logic to validate the number of units based on the start and end times for time based services.
Place of Service	<placeofservice></placeofservice>	Y	Do not send a value, but the following placeholder must exist in the file: <placeofservice></placeofservice>
Note	<groupnote></groupnote>	Y	10,000 character limit.
Provider Documentation	<contacttype></contacttype>	Y	Multiple values can be sent. See Example 3 below.

Example 2: XML file with multiple start/end dates and times.

Example 3: XML file with multiple Provider Documentation types.

The XML File name must follow the required naming convention:

ProviderID_First5LettersofProviderLastName_mmddyyyy_hhmmAM_ActivitiesImport.x ml

Example: 16941_PURIF_09022019_1020AM_ActivitiesImport.xml

External Provider Activity Import Report

FL APD service providers who intend to use the Provider Activity Import functionality must submit a valid XML file of service activity data. There are several iConnect generated data elements required in the XML File. The service providers or designated worker will run the report from APD iConnect that will supply the required data for each provider.

1. Navigate to the Provider record and select the Authorizations tab.

2. From the Report menu, select External Provider Activity Import Data.

10. Import the results of this report into the receiving application or database and use the data to generate your XML file.

Application Configuration

File

The tasks described below are completed as a one-time setup. They are completed by the Service Provider.

My Dashboard > My Files > Upload

1. This access is defined at the provider > worker level. Once given access, the worker will be able to Upload and/or Download files for the associated Provider via My Dashboard > My Files > Upload. This step will make the link visible to the user on My Dashboard to upload the Provider's Activity XML file.

Quick Search	Consumers		Last Name	GO	ADVANCED SEARCH	
MY	DASHBOARE CONSUMERS	PROVIDERS INCIDENTS	CLAIMS SCHEDU	JLER UTILITIES	REPORTS	
CONSUMER	S	INCIDENTS	PROVIDE	RS	TASKS	
Division	My Incide	nt Ticklers	Referrals	> My M	1anagement (٥
	11		17			1
					Pending Approval Queue	
					My Files	0
					AAA1B NAPIS Export	
					Download	
					HaPI Upload	
					Import	
					My Harmony NAPIS Export	

2. For each applicable worker, navigate to the **Providers chapter**. Search for and select the worker's Provider record. Select the **Worker** tab. Search for and select the applicable worker. Select the **worker record** to open. Select the **Providers** subpage. Select the applicable Provider record > the Worker Provider details page displays. Check the **Upload HIPAA Files and Download HIPPA Files** checkboxes. From the **File** menu, select **Save and**

Close. This worker can now upload and download files for this provider in iConnect.

Chapter 2 | Workflow

The provider will be provisioned through FL APD's ID Pass system. The provider or designed worker will log into iConnect and upload the Activities Import XML file from My Dashboard.

Upload the XML File

1. Log into iConnect using the ID PASS/Centrify credentials provided by APD IT.

	Sign In
Direct	Vser Name

2. Using Role = Service Provider Worker, navigate to **My Dashboard** > **Tasks** > **My Files** > **Upload**.

				Welcon 8/16/201	ne, Jennife 9 3:42 PM	r Buck My Dashboard Sign Or	ut Service Provider We	orker 🗸 GO

3. The File Upload window displays. Update the following fields:

- a. Provider = Select the provider that is uploading the XML file. Only the providers the worker is associated to will display.
- b. File type = Activities Import
- c. File = browse to the location of the XML file on your computer and select to upload.
- d. Click Upload.
