Chapter 18 | QA- PDR High Score

The QIO Interface will import records into iConnect on a weekly basis and create Corrective Action Plan (CAP) records. The interface will import new PDR information, corrections and reconsiderations into iConnect to pre-populate a new CAP in a provider's record.

NOTE: Qlarant replaces any prior report with a NEW report and the new one counts as the active report. A new review ID is given and thus becomes the current active record for a provider replacing the previous one.

Example:

*IF a Report is sent and then a correction is sent - close the report and **remediate the correction** only*

*IF a Report is sent and then a reconsideration is sent- close the report and **remediate the reconsideration** only*

*IF a Report is sent, then a reconsideration, then a correction - close report and reconsideration, **remediate the correction***

*IF a Report is sent, then a correction, then a reconsideration - close report and correction, **remediate the reconsideration***

IMPORTANT: APD will complete and review the CAP in the Provider record to ensure it is correct. APD will then contact the Provider with the appropriate letter according to the plan of remediation type. The provider can begin working on the CAP once this letter has been received.

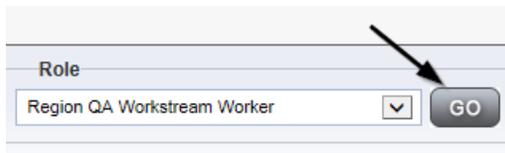

Do not work on any CAP within your record before the APD QA Liaison has contacted you as this may result in additional items being added to your CAP.

As Needed: CAP Late

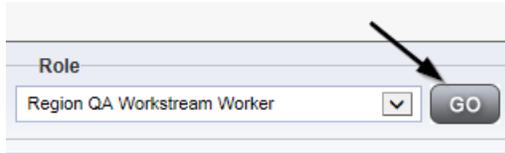

The QA Workstream Worker will add a new note if the Provider completes the POR but it is more than 7 calendar days past the 90 day timeframe. The CAP will be closed as CAP Late. The QA Workstream Worker may choose to run the Provider CAP report first to confirm. Proceed to [Generate Provider CAP Report](#) if this step is necessary.

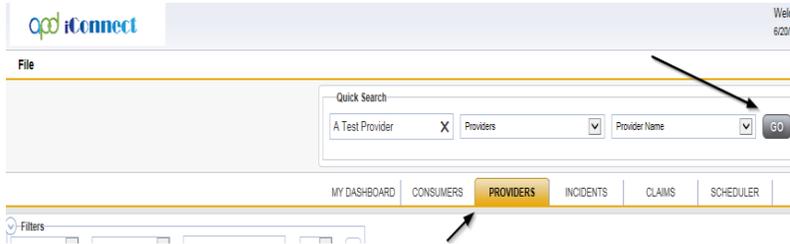

Proceed to [Update CAP Item](#) to update each item status as CAP Late first, then proceed to [Update CAP Detail Record](#) to update the CAP details record status to CAP Late. Once complete, proceed to update the note as outlined in the steps below.

CAP Late is defined as – A valid obstacle prevented the Provider/APD from sending/receiving/reviewing documents within the 90-day remediation period, but a good faith effort was applied, and the review was able to be closed beyond the required 90-day period. This should not exceed 14 days from the original 90-day deadline.

2. Navigate to the **Providers** chapter and enter the Provider's name in the Quick Search filter and click go.

These do not need to be updated to CAP Not Compliant.* Additionally, proceed to [Update CAP Detail Record](#) to update the CAP details record to CAP Not Compliant and then update the note as outlined below.

The QA Workstream Worker will update the pending Plan of Remediation/Supervisor Review note if the Provider does not complete the Plan of Remediation and the 90-day clock has expired. The CAP will be closed as Not Compliant.

CAP Not Compliant is defined as – All required documentation was not valid/correct/received from the provider within the 90-day remediation period, and there was no good faith communication between the provider/APD within the 90-day period to explain. A POR cannot be closed as CAP Not Compliant until the 90-day period has expired.

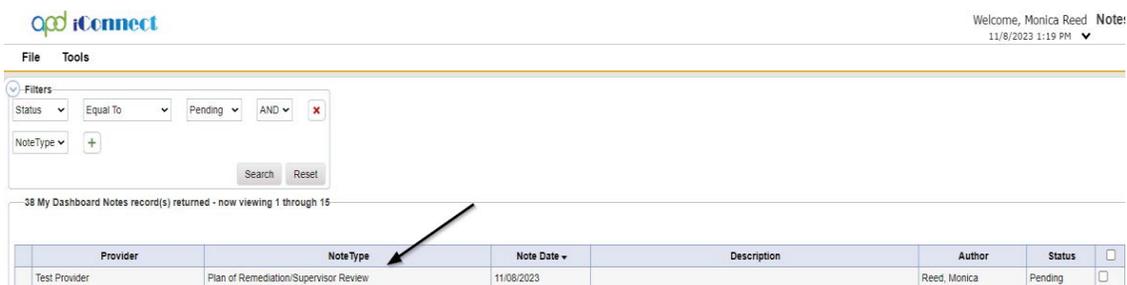

1. Set “Role” = Region QA Workstream Worker then click **Go**

2. Navigate to the **My Dashboard > Providers > Notes > Pending** and click the hyperlink for the Pending notes.

As Needed: Correction/Reconsideration

The QA Workstream Worker may need to close an original CAP record due to a correction or reconsideration being sent through the import.

Qlarant replaces any prior report with a NEW report and the new one counts as the active report. A new review ID is given and thus becomes the current active record for a provider replacing the previous one.

Proceed to [Update CAP Item](#) to update each item as Correction/Reconsideration and then proceed to [Update CAP Detail Record](#) to close the CAP record as Correction/Reconsideration.
