

WSC Mentee Role and Tasks for QOs and Mentors in iConnect

Introduction

Waiver Support Coordinators (WSCs) in the mentorship program will gain access to iConnect under the WSC Mentee role. This will allow the Mentee to be assigned a caseload and complete tasks as it relates to the mentorship program. The WSC Mentee role has limited access and will require the Mentor to approve some tasks such as progress notes and cost plans.

The Qualified Organization (QO) owner or designee in the Service Provider role must complete prework to allow the WSC Mentee and the Mentor to complete their tasks.

This job aid will break down the tasks that need to be taken by the QO owner/designee, the Mentor and the Mentee.

Planned services may be edited for several reasons. A planned service may exceed the budget, and the dates need editing to decrease the amount requested. A planned service may only be partially approved following a region or state office review, and the units may need to be decreased. Planned services are edited as a result of an approved provider expansion request. Regardless of the reason, the steps to edit the planned service are the same. Prior to making edits the WSC will need to reverse the status of the cost plan.

Follow the steps in [As Needed: Reverse Status of Cost Plan](#).

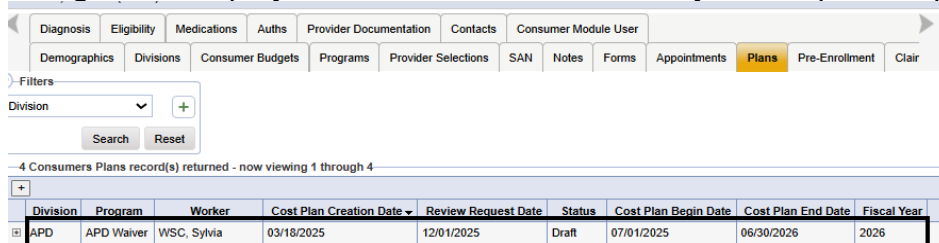

1. To begin, log into iConnect and set Role to **WSC Mentee**. Click **Go**.

2. Navigate to the Consumer's record and click the **Plans** tab.

Remove Planned Services

Planned services may need to be deleted when an error is made or when a planned service is denied. The Planned services must be removed from the Plan to be excluded from future plan validations. The WSC Mentee and other designated staff will have access to the WSC Cost Plan Adjustment role in iConnect. You cannot delete a planned service that has already been pushed to an authorization.

- When a service is denied by the Region or State Office reviewer, the Mentee/Mentor will be notified by monitoring My Dashboard for incoming Notes.
 - Note Type = Cost Plan Review.
 - Sub Type = Not Approved.
- To delete a planned service, select the **WSC Cost Plan Adjustment** role and click **Go**.

WSC Mentee Role – Add SANs Request

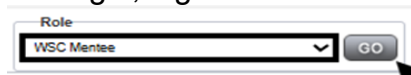

If a client has significant additional needs that exceed the algorithm amount or cannot be met within their current budget, the WSC Mentee submits a Significant Additional Needs (SAN) request. Prior to submitting a SAN request, the Waiver Support Coordinator should work with the consumer to:

1. Identify resources outside of the iBudget Waiver program to meet the individual's needs;
2. Address the individual needs within the existing budget; or
3. Move unallocated or unused funds to meet the needs.

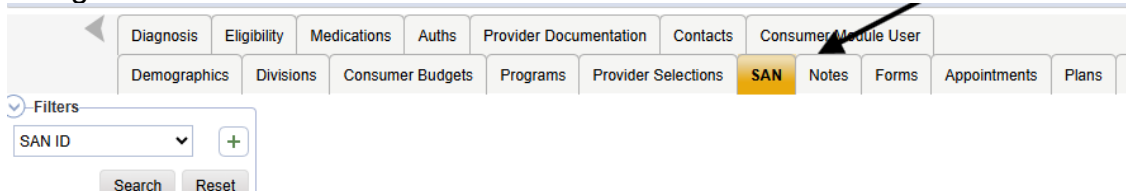

For more detail instructions on how to complete a SANs, please review the [APD iConnect SAN Training Guide for WSCs](#).

The WSC Mentee can begin the SANs process; however, the WSC Mentor will need to be added to the WSC SAN request and will review prior to Status being updated to Submitted.

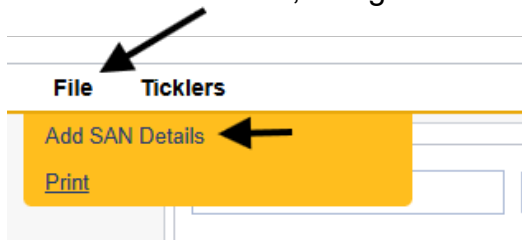

1. To begin, log into iConnect and set Role to **WSC Mentee**. Click **Go**.

2. Navigate to the Consumer's record and click the **SAN** tab.

3. To add a new SANs, navigate to **File > Add SAN Details**

- Fill out the SANs details and add the WSC Mentor to the SANs detail screen.
